Journal of Mathematical Biology

Volume 36 1997/1998

Managing Editors
K.P. Hadeler, Tübingen
A. Hastings, Davis, CA

Editorial Board
H.T. Banks, Raleigh, NC
O. Diekmann, Utrecht
J. Gani, Canberra
F.C. Hoppensteadt, Tempe, AZ
S. A. Levin, Princeton, NJ
T. Nagylaki, Chicago, IL
L.A. Segel, Rehovot

Advisory Board
W. Alt, Bonn
S. Amari, Tokyo
R.M. Anderson, Oxford
W. Bühler, Mainz
V. Capasso, Milano
C. Clark, Vancouver
B.D. Coleman, Piscataway, NJ
P. Colli-Franzone, Pavia
J.D. Cowan, Chicago, IL
K. Dietz, Tübingen
P.C. Fife, Salt Lake City, UT
S.P. Hastings, Pittsburgh, PA
U. an der Heiden, Witten-Herdecke
W. Jäger, Heidelberg
S. Karlin, Stanford, CA
S. Kauffman, Philadelphia, PA
N. Keyfitz, Laxenburg
J.F.C. Kingman, Oxford
N. Kopell, Boston, MA
M. Mangel, Santa Cruz, CA
R.M. May, Oxford
M. Mimura, Tokyo
R.M. Miura, Vancouver
G. Oster, Berkeley, CA
H.G. Othmer, Salt Lake City, UT
L.A. Peletier, Leiden
A.S. Perelson, Los Alamos, NM
P. Richter, Bremen
J.M. Rinzel, Bethesda, MD
S. Sawyer, St. Louis, MO
K. Sigmund, Wien
H. L. Smith, Tempe, AZ
M. Turelli, Davis, CA
J.J. Tyson, Blacksburg, VA

Springer

Journal of Mathematical Biology

Founded and edited in 1974 by H. J. Bremerman, F. A. Dodge Jr., and K. P. Hadeler.
As of Vol. 9 (1980) edited by K. P. Hadeler and A. Hastings.

Copyright
Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review of thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warrantly, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA: Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0303-6812, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Contents of Volume 36 (1997/1998)

An K-N → Luo Z-P

Baer SM → Wu H-Y
Beder JH, Gomulkiewicz R: Computing the selection gradient and evolutionary response of an infinite-dimensional trait 299
Bees MA, Hill NA, Pedley TJ: Analytical approximations for the orientation distribution of small dipolar particles in steady shear flows 269
Beretta E → Kuang Y
Boer MP → Kooi BW
Brøns M → Sturis J

Castillo-Chavez C → Dushoff J
Chávez-Ross A, Franks S, Mason HD, Hardy K, Stark J: Modelling the control of ovulation and polycystic ovary syndrome 95
Collings JB: The effects of the functional response on the bifurcation behaviour of a mite predator–prey interaction model 149
Coward E: Equivalence of two Fourier methods for biological sequences 64
Cushing JM → Henson SM

Damaggio ML → Pugliese A
de Jong G → Doebeli M
Diekmann O, Gyllenberg M, Metz JAJ, Thieme HR: On the formulation and analysis of general deterministic structured population models. I. Linear Theory 349
Doebeli M, de Jong G: A simple genetic model with non-equilibrium dynamics 550
Dubey B → Shukla JB
Dushoff J, Huang W, Castillo-Chavez C: Backwards bifurcations and catastrophe in simple models of fatal diseases 227

Edelstein-Keshet L, Watmough J, Grunbaum D: Do travelling band solutions describe cohesive swarms? An investigation for migratory locusts 515
Ellner SP, Sasaki A, Haraguchi Y, Matsuda H: Speed of invasion in lattice population models: pair-edge approximation 469
Esipov SE, Shapiro JA: Kinetic model of *Proteus mirabilis* swarm colony development 249

Franks S → Chávez-Ross A

Gomulkiewicz R → Beder JH
Grunbaum D → Edelstein-Keshet L
Gyllenberg M → Diekmann O

Haccou P, Iwasa Y: Robustness of optimal mixed strategies 485
Hanson FB, Tuckwell HC: Population growth with randomly distributed jumps 169
Haraguchi Y → Ellner SP
Hardy K → Chávez-Ross A
Henson SM, Cushing JM: The effect of periodic habitat fluctuations on a nonlinear insect population model 201
Hill NA → Bees MA
Huang W → Dushoff J

Iwasa Y → Haccou P

Kooi BW, Boer MP, Kooijman SALM: Complex dynamic behaviour of autonomous microbial food chains 24
Kooij RE → Zegeling A
Kooijman SALM → Kooi BW
Kuang Y, Beretta E: Global qualitative analysis of a ratio-dependent predator–prey system 389

Liberman U → Manos H
Luo Z-P, An K-N: A theoretical model to predict distribution of the fabric tensor and apparent density in cancellous bone 557

Manos H, Liberman U: Discrete chiasma formation models and their associated high order interference 448
Mason HD → Chávez-Ross A
Matsuda H → Ellner SP
Mestl T → Plahte E
Metz JAJ → Diekmann O

Nakajima H → Takada T
Notohara M: The number of segregating sites in a sample of DNA sequences from a geographically structured population 188

Omholt SW → Plahte E
Ottesen JT: Modelling of the baroreflex-feedback mechanism with time-delay 41

Pedley TJ → Bees MA
Perlitz M, Stephan W: The mean and variance of the number of segregating sites since the last hitchhiking event 1
Plahte E, Mestl T, Omholt SW: A methodological basis for description and analysis of systems with complex switch-like interactions 321
Pugliese A, Rosà R, Damaggio ML: Analysis of a model for macroparasitic infection with variable aggregation and clumped infections 419

Rosà R → Pugliese A

Sasaki A → Ellner SP
Schreiber SJ: Generalist and specialist predators that mediate permanence in ecological communities 133
Shapiro JA → Esipov SE
Shukla JB, Dubey B: Modelling the depletion and conservation of forestry resources: effects of population and pollution 71
Stark J → Chávez-Ross A
Stephan W → Perlitz M
Stiefenhofer M: Quasi-steady-state approximation for chemical reaction networks 593
Sturis J, Brøns M: Local and global bifurcations at infinity in models of glycolytic oscillations 119

Takada T, Nakajima H: Theorems on the invasion process in stage-structured populations with density-dependent dynamics 497
Thieme HR → Diekmann O
Tuckwell HC → Hanson FB

Watmough J → Edelstein-Keshet L
Wu H-Y, Baer SM: Analysis of an excitable dendritic spine with an activity-dependent stem conductance 569

Zegeling A, Kooij RE: Uniqueness of limit cycles in models for microparasitic and macroparasitic diseases 407
